These managing mothers have the knack of making over garments and odds and ends, which are made to look new by coloring over with Magic Dyes, at expense of only a few cents and a little easy work, for it is easy to dye with Magic Dyes. Use a darker dye than the goods you wish to color over, follow the simple directions faithfully and you cannot fail to be pleased with the result. Large 10 cent packages of Grant Holden, Yale.

Letter writers do not all know perhaps, how postage stamps are made. The manufacture of the neat little "stickers" is a very tedious job and requires great care. Every part of the postage stamp making is done by hand. The stamp designs are engraved on steel two hundred stamps on a single plate. The plates are inked by two men and then are printed by a girl and a man on a large hand press and are dried as fast as printed and gummed with paste made from potatoes. This paste is dried by placing the sheet in a steam fanning machine, and then the stamps are subjected to a pressure of two thousand pounds on a hydraulic press. Next the sheets are cut so that each contains one hundred stamps, after which the paper between them is perforated, and after being pressed are taken away. If a single stamp is injured the whole sheet is destroyed.
